CIRPARK

CAR PARK OCCUPATION AND
GUIDANCE SYSTEM CIRPARK

Cirpark is a **powerful** and **modern** system, which main objective is to help to get an optimum management of parking facilities.

To obtain that purpose, the system shows information to drivers for park in the quicker time and offering tools to the operators to obtain maximum **profit** of installation.

Cirpark is one of the most advanced **car park guidance systems** of the market. It allows guiding the user directly to a free park spot in an intuitive and fast form, by using ultrasonic sensors with lights indicators and display panels for information for free spaces.

Cirpark is an **own designed product**, which is in a **constant evolution** since year 2000.

More than 25,000 car spots installed in several countries in more than 50 car park.
